15. (Currently Cancelled)
16. (New) A dumping utility trailer, comprising:
  - a) a trailer body mounted to an axle and wheel set;
  - b) a rigid tow bar element pivotably attached to the front end of the trailer body and connectable to a tow vehicle such that the rearward movement of the tow vehicle, with the trailer wheels blocked or locked to prevent rearward rolling of the dumping utility trailer, results in rotation of the trailer body about the axle and dumping of any load in the dumping utility trailer.
17. (New) The dumping utility trailer of Claim 16 wherein the rigid tow bar element is connectable to the tow vehicle either directly, or through a linkage.
18. (New) The dumping utility trailer of Claim 16 wherein the tow bar is non-planar in shape in a plane parallel with the ground, but contains an out-of-plane bend to achieve the desired rotation of the trailer body about the axle recited in Claim 16.
19. (New) The dumping trailer of Claim 16 further comprising a locking means for maintaining the trailer body in a substantially horizontal fixed position relative to the ground to prevent unintended dumping of any load in the dumping utility trailer.
